Investors must realize that all investments in mutual Funds and securities are subject to market risks. Our target return / dividend range cannot be guaranteed and it should be clearly understood that the portfolio of the Fund is subject to market price fluctuations and other risks inherent in all such investments. The risks emanate from various factors that includes, but are not limited to:

- (1) **Equity Risk** - Companies issue equities, or stocks, to help finance their operations and future growth. The Company's performance outlook, market activity and the larger economic picture influence the price of a stock. Usually when the economy is expanding, the outlook for many companies is good and the stock prices may rise and vice versa.
- (2) **Sectoral Risk** - Potential for financial loss or underperformance resulting from a portfolio's or institution's concentrated exposure to a specific economic sector, such as energy. When a large portion of investments or assets is tied to a single sector, adverse events—like regulatory changes, market downturns, or sector-specific shocks—can disproportionately impact overall performance.
- (3) **Credit Risk** - Credit Risk comprises Default Risk and Credit Spread Risk a. Each can have negative impact on the value of the GOP Ijara Sukuk etc.
 - **Default Risk** - The risk that the issuer of the security will not be able to pay the obligation, either on time or at all;
 - **Credit Spread Risk** - The risk that there may be an increase in the difference between the Profit/return of any issuer's security and the return/markup rate of a risk free security. The difference between this return/mark up rates is called a "credit spread". Credit spreads are based on macroeconomic events in the domestic or global financial markets. An increase in credit spread will decrease the value of income and including money market instruments
- (4) **Government Regulation Risk** - Government policies or regulations are more prevalent in some securities and financial instruments than in others. Funds that invest in such securities may be affected due to change in these regulations or policies, which directly or indirectly affect the structure of the security and/or in extreme cases a governmental or court order could restrain payment of capital, principal or income.
- (5) **Country or Political Risk** – The uncertainty of returns caused by the possibility of a major change in the political or economic environment of the country such as break down of law and order, war, natural disasters, etc. and any governmental actions or legislative changes or court orders restraining payment of principal or income.
- (6) **Interest Rate Risk** – A rise or decline in interest rates during the investment term may result in a change in return provided to investors.
- (7) **Price Risk** - The price risk is defined as when the value of the Fund, due to its holdings in such securities rises and falls as a result of change in interest rates.
- (8) **Liquidity Risk** – Liquidity risk is the possibility of deterioration in the price of a security in the Fund when it is offered for sale in the secondary market.
- (9) **Settlement Risk** – At times, the Fund may encounter settlement risk in purchasing / investing and maturing / selling its investments, which may affect the Fund's performance etc.
- (10) **Events Risk** - There may be adjustments to the performance of the Fund due to events including but not limited to, natural calamities, market disruptions, mergers, nationalization, insolvency and changes in tax law.

(11) Reinvestment Rate Risk – In a declining interest/ markup rate economic environment, there is a risk that maturing securities or coupon payments will be reinvested at lower rates, which shall reduce the return of the Fund compared to return earned in the preceding quarters.

(12) Redemption Risk - There may be special circumstances in which the redemption of Units may be suspended or the redemption payment may not occur within six working days of receiving a request for redemption from the investor.

(13) Distribution Risk – Dividend distribution may also be liable to tax because the distributions are made out of the profits earned by fund and not out of the profits earned by each Unit Holder (Muwakkil). Unit Holder (Muwakkil)s who invest in a fund before distribution of dividends may be liable to pay tax even though they may not have earned any gain on their investment, as return of capital to investors upon distribution is also taxable.

(14) Investor Concentration Risk- The risk that the performance and liquidity of the Portfolio is adversely impacted due to few large investors investing-in or redeeming from the fund over a short period of time. Factors contributing to such an adverse impact may include, but not limited to, deviation in Portfolio allocation, price impact of portfolio rebalancing, higher allocation in illiquid scripts etc.

(15) Scheme Specific Risk – The Scheme is subject to the following risks: (i) The performance of the Fund may be affected by changes in risk associated with trading volumes, liquidity and settlement systems in equity and debt markets. (ii) The Fund, based on fund manager`s outlook, may allocate the entire portfolio to underlying investments in equity Component under the Authorized Investments mentioned in this Offer Document and Units of the Fund may remain invested in such underlying investments for certain period of time without any participation in the equity component of the Investment Segment.

OPINION OF SHARIA ADVISOR ON LUCKY ISLAMIC ENERGY FUND

I, as Sharia Advisor of Lucky Investments Limited, am issuing an opinion on Lucky Islamic Energy Fund (LIEF).

In light of above, my opinion is as follows:

I have reviewed the Security structure of the fund, the Modes of Investments, the Trust Deed, the Offering Document and Term Sheet of LIEF and based on the information available to me, I have not observed any information to conclude that aforementioned are not compliant as per the provisions of Sharia Principles and Rules.

The Fund is based on the principle of Investment Agency (Wakalat-ul-Istithmar) where LIL in the capacity of Wakeel (Agent) shall manage the funds received from the investors and invest on their behalf in Sharia Compliant securities as permitted by Rules, Regulations, and the Sharia Advisor.

Based on the above, I have determined that all the provisions of the fund and its operations are Sharia compliant (without involving Gharar and Riba) and in accordance with criteria established. Therefore, this concludes that there are no Sharia objections on LIEF.

Allah is the guide to success.
